Completion date of improvements: MONTH _______ YEAR _______

EXISTING FACILITIES:  WELL □  SEPTIC SYSTEM/CESSPOOL □  COMMUNITY WATER □  COMMUNITY SEWER □

Describe any problems you are having with existing facilities: ___________________________

Do you know of any archeological / historical sites on the property?  YES □ NO □ (If yes show on site drawing)

THIS SECTION FOR IHS USE:  Date Application Received: ____________ Date Tribe Signed: ____________
Please provide a map showing applicable highways and roads as well as pertinent landmarks that will assist IHS personnel, Tribal employees and contractors in finding your home site. Written instructions, if deemed necessary, are encouraged as well. A google map is the best, just attach to this application and note here there is a google map attached.
SITE DRAWING

Please show rough locations of property corners, proposed or existing house location, proposed or existing access road/driveway, buried utilities (gas, electric, water, sewer, etc.), etc. A google map is the best, just attach to this application and note here there is a google map attached.
**APPLICANT’S RESPONSIBILITIES:** READ CAREFULLY, THIS IS A LEGAL DOCUMENT.

1. This is an APPLICATION for service. The provision of sanitation facilities is dependent on Indian Health Service (IHS) site review, Tribe’s requirements, verification of home construction, improvements, and availability of funds.

2. No services can be provided without a completed and signed Application for Sanitation Facilities Form.

3. Application must be given to the Tribe associated with the service area that contains the home site property. The Tribe will forward the Application to IHS. Applicants without Tribal representation will forward the Application directly to the IHS.

4. Applicant must provide proof of a legal claim to the land (e.g., copy of allotment, lease, or deed) as part of this application. The home site must be a primary residence of the Applicant. No services can be provided to other than primary residences.

5. An IHS representative will visit the home site to determine site suitability. Prior to this visit, the Applicant must locate property corners, underground utilities, and the proposed house location (new homes). See Site Drawing.

6. By way of the Applicant's signature, IHS representatives, Tribal employees and contractors are granted permission to enter upon the land for the purpose of carrying out the site approved work. This work may include, but is not limited to, digging soil test pits, conducting percolation tests, and drilling test wells. The Applicant agrees to waive all claims, which may arise from such entry and testing, except those claims which may be recognized under the General Tort Claims Act. If the Applicant is not the landowner, the landowner must co-sign this application.

7. It is important that the Applicant understand that under Public Law 86-121, IHS cannot own, operate, or maintain the Applicant's completed facilities. All construction facilities will be transferred to the Applicant when construction is completed. For community facilities, the Applicant’s responsibility is for individual facilities such as water service lines from the house to the curb stop or meter and sewer service lines from the house to the property line.

8. The IHS does not provide inside plumbing. Plumbing must be inside the house with a protruding stub 5-foot beyond the foundation to connect to outside plumbing.

9. The Applicant agrees to operate, maintain, and keep these facilities in good order at his own expense. IHS will provide, upon the Applicant's request, appropriate training in the proper operation and maintenance of the installed facilities.

10. The Applicant (or Landowner if Applicant is not the Landowner) further agrees that if ownership of said property is sold or transferred outside the family within a 10-year period following installation of these facilities, the Applicant (or Landowner if Applicant is not the Landowner) will repay the U. S. Government for the depreciated value of the facilities. Depreciation shall be straight line based on a life expectancy of 15 years for individual water and sewer facilities and 20 years for community installation.

IT IS STRONGLY RECOMMENDED THAT DEVELOPMENT OF NEW SITES NOT OCCUR UNTIL AVAILABILITY OF WATER AND SEWER SERVICE HAS BEEN DETERMINED. IT IS FURTHER RECOMMENDED THAT OCCUPANCY OF NEW HOUSES NOT OCCUR PRIOR TO RECEIPT OF SANITATION FACILITIES.

**TRIBAL- AUTHORITY SIGNATURE REPRESENTS REQUEST FOR FACILITIES FOR THIS APPLICANT**

I understand the Applicant's Responsibilities and Landowner's Responsibilities as described, and I agree to the IHS and the Tribe verifying information provided on this application.

**LANDOWNER (IF NOT APPLICANT):** ___________________________ DATE __________________
