

## NOTICE TO THE COMMUNITY

The Penobscot Nation Child Support Agency (PNCSA) is completing a review of the agency's child support guidelines. PNCSA currently follows Maine Title 19A Chapter 63: Child Support Guidelines. PNCSA has attached the table that the agency uses for calculating child support, the child support worksheet, supplemental worksheet (which is not used often) along with directions on how child support is calculated.

PNCSA can request of the court, an alternative way to pay child support called in-kind. This is done when the person who owes child support is having a hard time to pay with money. In-kind helps non-custodial parents meet their weekly child support obligation. In-kind needs to be agreed upon by both parties, be included in a child support order, have an amount assigned to it and used temporarily to address current child support, not arrears.

In 2016 the state of Maine went from a two-tiered table in which the child support amount was adjusted at the age of 12 to a single tiered child support table which is the one attached for review. **PNCSA will be posting this information for a week on the Tribal website and will hold a zoom public hearing on Thursday, July 28, 2022, 1:00pm to 2:00pm.** Feedback is limited to the guideline table, how we calculate and the worksheets. For further questions please contact Mali Williams at (207) 817-7355. Thank you for your cooperation.

SUPPLEMENTAL  
CHILD SUPPORT  
WORKSHEET

➤ This form to be used when parents provide substantially equal care. CS worksheet  
Must be completed first

Higher Income Parent is the ☐ Plaintiff ☐ Defendant (higher of the line 7a and 7b)

15. Higher income parents share of basic weekly support  
\_\_\_\_\_ (higher of line 8a and 8b) X \_\_\_\_\_ (line 9c) = 15. \_\_\_\_\_

16. Enhanced weekly support entitlement  
\_\_\_\_\_ (line 9c x 1.5) X \_\_\_\_\_ = 16. \_\_\_\_\_

17. Lower income parent's share of enhanced weekly support entitlement  
\_\_\_\_\_ (higher of line 8a and 8b) X \_\_\_\_\_ (line 16) = 17. \_\_\_\_\_

18. Higher income parent's share of enhanced weekly support entitlement  
\_\_\_\_\_ (higher of line 8a and 8b) x \_\_\_\_\_ (line 16) = 18. \_\_\_\_\_

19. Enhanced Support Obligation  
\_\_\_\_\_ (line 18) - \_\_\_\_\_ (line 17) = 19. \_\_\_\_\_

20. Presumptive Parental Support Obligation  
Enter the amount from line 15 or line 19, whichever is less = 20. \_\_\_\_\_

21. Additional expenses to be shared by parents in proportion to their incomes:

Expense	Weekly amount	Parent paying	HIP share	LIP share
Health Insurance (enter amount line 10)				
Child Care (Enter amount line 11)				
Extraordinary Medical Expenses (enter amount line 12)				

HIP: Higher Income Parent LIP: Lower Income Parent

Total: \$ \_\_\_\_\_ \$ \_\_\_\_\_

Adjudgment for additional expenses

(If HIP pays the expense(s), subtract LIP share = 21. \_\_\_\_\_

If LIP pays the expense(s), add HIP share)

Total weekly support obligation of HIP to be paid to LIP = 22. \_\_\_\_\_

### CALCULATING "AMOUNT FROM TABLE" FOR LINE 9 OF THE WORKSHEET

1. Look at the Child Support Table.
2. Circle the amount in the Table under "Parents' Combined Annual Income" that is closest to the "Combined Adjusted Gross Income" on Line 7c of the Worksheet.
3. In the "Number of Children" column, circle the TOTAL number of children in this case.  
Draw a line from the circled number of children down the column until it meets the circle you drew for parents' yearly combined income. Circle the number and write the number you circled in the space after "amount from table" on Line 9b of the Worksheet.
4. For example, if you have two children and a combined adjusted gross income of \$18,000, use the column for 2 children. The "Parents' Combined Annual Income" and the "Number of Children" lines should meet at \$54.  
Using this example, you would write the following on the Worksheet:  
9. Total number of children 2 multiplied by amount from table \$ 54 = \$ 108.

---

### NON-PRIMARY CARE PROVIDERS WITH VERY LOW INCOMES

When the non-primary care provider's income is very low, different rules for calculating child support apply. If the annual gross income of the non-primary care provider is less than the federal poverty guidelines, the non-primary care provider's weekly parental support obligation may not exceed 10% of the non-primary care provider's weekly gross income, regardless of the amount of the parties' combined annual gross income. No additional amounts such as health insurance, child care, or extraordinary medical expenses should be added to this total. Please note this amount is calculated assuming a household of one person.

If the non-primary care provider's annual gross income, without adjustments, is in the self-support reserve for the total number of children for whom support is being determined, the amount listed in the self-support reserve multiplied by the number of children is the non-primary care provider's basic support obligation for the children, regardless of the parties' combined annual gross income. The non-primary care provider's proportional share of childcare, health insurance premiums, and extraordinary medical expenses is added to this basic support obligation. This paragraph does not apply if its application would result in a greater support obligation than a support obligation determined without application of this paragraph.

If the non-primary care provider's income falls in the self-support reserve (the shaded area of the Child Support Table), check the box in the non-primary care provider column next to "self-support reserve" on the child support worksheet. If the non-primary care provider's income is lower than all income amounts listed in the Child Support Table, check the box next to "below poverty level" on the child support worksheet.

### CALCULATING AMOUNT FOR LINE 6 OF THE WORKSHEET (OTHER CHILDREN LIVING WITH NON-PRIMARY CARE PROVIDER)

If the non-primary care provider has a legal obligation to support other children living in his/her home, the non-primary care provider is entitled to an adjustment. The amount of the adjustment is written on line 6. To determine the adjustment to be entered on Line 6, follow the steps in paragraphs 1, 2, 3, and 4, with some changes. In step 2, circle the amount in the Table under "Parents' Combined Adjusted Gross Income" that is closest to the non-primary care provider's gross income at Line 5. Do not circle the combined adjusted gross income of both parties in this case. In step 3, in the "Number of Children" column, circle the total number of other children living with the non-primary care provider that the non-primary care provider has a legal obligation to support. Do not circle the total number of children in this case.

**Warning:** If there is an existing child support order for the children in this case, the adjustment may not apply.

#### **CALCULATING THE NON-PRIMARY CARE PROVIDER ADJUSTMENT FOR SECTION 14b OF THE WORKSHEET**

If the non-primary care provider pays directly out of pocket the cost of the child(ren)'s health insurance, child care for children under the age of 12 (or otherwise eligible), and/or extraordinary medical expenses, that parent's weekly support obligation must be adjusted. The amount of the adjustment is the cost of the health insurance for the children (line 10), the cost of child care for the child(ren) under the age of 12 (or otherwise eligible) (line 11), and the cost of extraordinary medical expenses for the child(ren) (line 12). Subtract lines 10, 11, and 12 from the Non-Primary Care Provider's support obligation to determine the amount that must be paid as support.

If the primary care provider pays the cost of the children's health insurance, child care for children under the age of 12 (or otherwise eligible), or extraordinary medical expenses, or if neither parent pays for health insurance, child care for children under the age of 12 (or otherwise eligible), or extraordinary medical expenses, enter 0 on the line next to "Non-Primary Care Provider Adjustment."

## CHAPTER 6 – CHILD SUPPORT GUIDELINES

---

**CHAPTER 6 - CHILD SUPPORT GUIDELINES**

---

**1. APPLICABILITY TO ADMINISTRATIVE HEARINGS**

The Child Support Guidelines (19-A M.R.S. §§ 2001-2009) apply to any proceeding in which a responsible parent's child support obligation is established or modified.

**2. CHILD SUPPORT TABLE**

Notwithstanding Adopted Rule #2016-029, the Child Support Table in effect on June 30, 2016 shall remain in effect through July 28, 2016. Beginning July 29, 2016, the following Schedule of Basic Weekly Child Support is the Child Support Table referred to and defined by 19-A M.R.S. § 2001(3).

The Table was created by The Cutler Institute for Health and Social Policy, Edmund S. Muskie School of Public Service, University of Southern Maine, in 2012, pursuant to a quadrennial review of Maine's Child Support Table required under 45 C.F.R. § 302.56. The design of the Table is based on a number of key economic decisions and assumptions. The Table uses the Betson-Rothbarth Estimator for estimating child-rearing expenditures. [David M. Betson, Alternative Estimates of the Cost of Children from the 1980-86 Consumer Expenditure Survey, Report to U.S. Department of Health and Human Services (Office of the Assistant Secretary for Planning and Evaluation) University of Wisconsin Institute for Research on Poverty (September 1990); Lewin/ICF, Estimates of Expenditures on Children and Child Support Guidelines, Report to U.S. Department of Health and Human Services (Office of the Assistant Secretary for Planning and Evaluation, Lewin/ICF (October 1990); David M. Betson, Review of Statewide Uniform Child Support Guideline 2010, A Report to the California Legislature, (June 2011)]. Dr. Betson's research provides estimates of the proportion of household consumption expenditures ascribed to children. These estimates have been realigned for Maine's relatively low income, and updated to reflect the 2011 Consumer Pricing Index. The most significant assumptions are noted below.

A. The Table is designed to provide child support as a specified portion of the parents' gross income. A table of child support based on net income is developed before converting the tables to gross income. The tables are converted to gross income for three reasons:

1. Use of gross income greatly simplifies use of the Table because it obviates the need for a complex gross to net calculation in individual cases;
2. Use of gross income can be more equitable because it avoids non-comparable deductions that may arise in making the gross to net calculation in individual cases; and
3. Use of gross income does not cause child support to be increased when an obligor acquires dependents or claims more exemptions, and therefore has a higher net income for a given level of gross income.

## CHAPTER 6 – CHILD SUPPORT GUIDELINES

In converting the Table to a gross income base, The Cutler Institute assumed that the obligor claims one exemption (for filing, two for withholding) and the standard deduction. This is the most favorable assumption that can be made concerning an obligor's filing status. Obligor's with more than one exemption, or with itemized deductions, would have a slightly higher obligation under an equivalent net income guideline.

B. Tax Exemptions for child(ren) due support. The Table presumes that the noncustodial parent does not claim the tax exemptions nor the child tax credit for child(ren) due support. In computing federal tax obligations, the custodial parent is entitled to claim the tax exemption(s) for any divorce occurring after 1984, unless the custodial parent signs over the exemption(s) to the noncustodial parent each year. The child tax credit is given to the parent claiming the tax exemption. The Table presumes that the custodial parent claims the exemption(s) and child tax credit for the child(ren) due child support. Depriving the custodial parent of the exemptions means the custodial parent is receiving less support than the Tables provide.

C. Income assumed to be taxable. Because the Table has withholding tables built into it, the design assumes that all income of both parents is taxable.

D. Subsistence needs of the noncustodial parent.

1. Self-support reserve. Incorporated into the Table is a "self-support reserve" for obligors. This concept allows low income obligors to retain enough income after payment of taxes and child support to maintain at least a subsistence level of living (i.e., the self-support reserve). The self-support reserve is shaded in the Table. The obligor's basic support obligation has already been reduced within the self-support reserve to allow the low income obligor to retain more income. If the obligor's annual gross income, without adjustments, is in the self-support reserve, the amount listed in the Table for the number of children is the obligor's basic support obligation, regardless of the parties' combined gross income. The obligor's proportional share of childcare, health insurance premiums and extraordinary medical expenses are added to the basic support obligation to determine the obligor's total support obligation.
2. Federal poverty calculation. Obligor's earning less than the federal poverty wage for one person, regardless of the number of people in the obligor's household, pay no more than 10% of the obligor's weekly gross income as a weekly parental support obligation for all the children for whom a support award is being established or modified, regardless of the parties' combined annual gross income. This calculation is done for each family and deductions from the obligor's gross income are not made for other families.

E. The Table does not include expenditures on child care, extraordinary medical, and the child's share of health insurance costs. The Table is based on economic data that represents estimates of typical total expenditures on child-rearing costs up to age 18. The major categories of expenditures include food, housing, home furnishings, utilities, transportation,

## CHAPTER 6 – CHILD SUPPORT GUIDELINES

clothing, education, and recreation. Excluded from these figures are average expenditures for child care, children's extraordinary medical care, and the children's share of health insurance. These costs are deducted from the base amounts used to establish the Table because they are added to child support obligations as actually incurred in individual cases. Deducting these expenditures from the base amounts avoids double-costing them in the child support calculation.

F. The Table includes expenditures on ordinary medical care. Although expenditures for the children's extraordinary medical care and the children's share of health insurance are to be added to the child support obligation as actually incurred in individual cases, it is assumed that custodial parents will make some expenditures on behalf of the children's ordinary (i.e. out-of-pocket expenses not covered by insurance) medical care. The Table is based on the assumption that expenditures on ordinary medical care are \$250 per year per child.

G. Visitation costs are not factored into the Table. Since the Table is based on expenditures for children in intact households, there is no consideration given for visitation costs. Taking such costs into account would be further complicated by the variability in actual visitation patterns and the duplicative nature of many costs incurred for visitation (e.g. housing, home furnishings).
